

What Do Fleet Managers Do?

We Work With You...

Professional Fleet Managers:

- Have relevant educational credentials, many years, if not decades, of automotive experience.
- Work with your team to understand how vehicles fit within your business model.
- Develop a strategy to optimize vehicle usage while reducing overall operational costs.

As Industry Insiders...

Most auto manufacturers (OEMs) have their own unique fleet programs. Part of the Fleet Manager's job is to build and maintain relationships with each OEM's Fleet Department and stay up-to-date with each manufacturer's program parameters as well as frequent program changes and updates.

And Logistics Gurus

Our Fleet Management Specialists have the knowledge to determine the best mix of vehicles for your fleet. We help alleviate the administrative burden of managing a fleet's operations, offering regular maintenance reports, WEX Fuel Cards, and will remarket vehicles when the time comes.

At **Caritas Vehicle Services**, "Our Mission Is To Serve." As a small business, we are able to serve our clients customized vehicle management solutions that alleviate administrative burdens while fostering a mutually beneficial relationship.
